
SECUTIX, a subsidiary of ELCA, has developed the SecuTix 360° product to provide the entertainment industry with secure multichannel technology supporting online ticket sales.

In response to our growth, we are looking for

JAVA FULL STACK WEB DEVELOPER

YOUR MISSION As a member of the product team, you will:

- › Contribute in all phases of software development lifecycle, production monitoring, performance optimization, load/stress testing, online payment and security management
- › Be a part of multidisciplinary team whose mission is to write well designed, testable and efficient source code which can be easily integrate with partners as well as operate on various devices
- › Your flexibility and knowledge of the complete technological stack gives you the ability to work on all aspects of the system and to deliver high-valuable features with impact on international levels

The challenges of architecture, optimization and usability of the system are topics which encourage you to come up with excellent suggestions of improving the product in terms of performances, stability and security of our applications.

WE OFFER Established in Vietnam since 1998 we guarantee:

- › learning environment from interesting topics of our daily work: blockchain, chatbot, facebook in app purchase, Google Assistant AI integration, secure mobile ticket....
- › very attractive remuneration package
- › professional working environments with young and motivated teams
- › projects using state-of-the-art technologies and Agile methodologies
- › extensive coaching and training
- › flat hierarchies and cross-divisional collaboration
- › modern workplace
- › travel opportunities to Switzerland

YOUR PROFILE We expect from you:

- › Bachelor's degree in Computer Science
- › Experience in Java/J2EE, Spring Framework, Hibernate, with a good knowledge of its ecosystems
- › Expertise and hands on experience with Web Applications, technologies and tools such as: JavaScript, JQuery, ReactJS, HTML5, CSS3 (LESS, SASS, Media Queries), SPA, Responsive design, Web Services (REST, SOAP, etc ..)
- › A strong sense of ownership and responsibility for code quality that follows best practices

SECUTIX STORY

SecuTix helps sport, culture and leisure organisations boost ticket sales and enhance audiences' experience before, during and after live events. Our product, SecuTix 360°, is a cloud-based platform that combines ticketing and marketing functionality, and is offered as a white label SaaS service. Used by the largest sport clubs and stadiums, live entertainment businesses, and leading museums and cities across Europe, SecuTix manages the yearly sales of over 30 million tickets.
